

OMNIA SERIES 80/100

AUTO FEED DIE CUTTING MACHINE

Omnia has been designed to **automatically feed** and contour cut media to create exclusive packaging and unique labels. The operator can load different kinds of materials, with different sizes up to **60x80 cm / 23.6x31.5"** (Omnia 80) and up to **75x105 cm / 29.5x41.3"** (Omnia 100). Omnia will feed media to the cutting table using a suction system that lifts media from the feeder and drags it onto the conveyor. The feeder holds up to **600 sheets**, depending on thickness. Once in position, the camera will detect crop mark and execute the cut of the uploaded file. The processed sheets drop into the catch tray. The software can control multiple workflow options including cut files from various graphic design software, **QR Code mode**, and non-printed material. Omnia is perfect for die cutting cardstock projects including packaging, folders, business card and kiss-cut. With its robust design, it can also process heavy material such as corrugated cardboard, chip board and plastic sheets (forex).

INCREASE PRODUCTION CAPACITY - 24/7

The oversized feeder and the withdrawal system automatically pick up and load the materials into the cutting machine. The automatic crop mark detection allows a hands-free cutting process and a **signal tower light** will notify the operator that the feeder has dropped to the minimum quantity so it can be reloaded.

REAL INDEPENDENT WORKFLOW

Omnia Series is designed with the aim to make it work **automatically all day long without the presence of an operator**. Repeatability and reliability are two factors that summarize the concept of quality asseverated in Valiani Omnia.

SUPERIOR MANUFACTURING, QUALITY AND RELIABILITY

All Valiani machines are designed and developed with the aim to make them **last forever**.

THE ULTIMATE CUTTING SYSTEM

Omnia combines the strength and integrity of all Valiani digital machines with the automation of a cutting system capable to process long and repetitive jobs without having to attend the operation. Omnia 100 is thought to satisfy the growing demand of personalized die-cutting processes, **exclusive packaging** and unique labels without the added cost of dies and make-readies.

Designed to quickly load materials of various grammage and thickness, this automatic solution enables companies to manufacture everything in-house and stop outsourcing. The oversized catch tray, along with the suction cup pick-up system, guarantees a high level of autonomy and flexibility on a **vast array of materials** including paper, plastic board, corrugated board and PVC/Forex.

24/7

Omnia is designed and developed with the aim to make it work automatically all day long without the presence of an operator. Repeatability and reliability are two factors that best summarize the concept of quality asseverated in Valiani Omnia.

DOUBLE YOUR PRODUCTIVITY

The non-stop feeder can guarantee compatibility with the main **offset** and **digital printing** formats as well can collect **two SRA3** sheets at the time significantly increasing average output levels.

COST-EFFECTIVENESS AND TOP-LEVEL AUTOMATION

By eliminating the need for costly die-plates and increasing the in-house production, incomparable cost-savings for short to medium runs will be observed shortly.

Distinguishing features for every Omnia model

- Signal tower light
- Replaceable conveyor in autonomy
- Conveyor with guide to prevent media from deviating from path
- Support for laptop
- Oversized catch tray
- Oversized feeder (20 cm - 7.87" capacity)
- Nonstop sheet media loading
- Safety mats

10 Reasons Why

1. Continuous sheet media loading and processing
2. High-capacity Feeder
3. Perfect cutting and creasing on most materials
4. No operator needed
5. Cutting up to 12.7 mm - 1/2"
6. Simplified workflow
7. Unstoppable: work for a long time without any interruption
8. Camera and software to ensure precise graphics alignment
9. Ensured longevity at best value price
10. 100% made in Italy
